## INSTALLING MOBILE APP

---

This quick guide will help you to set up **CallSwitch Lite** on your smartphone - In order to install the CallSwitch Lite App you will need your smartphone, and your 'CallSwitch Account Details' email.

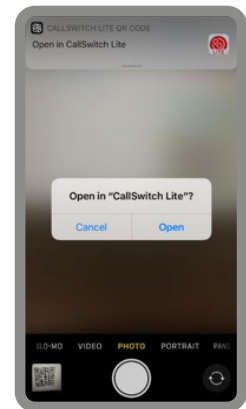

**Get ready... Here we go!**

- 1 Download the **CallSwitch Lite** app to your phone:

**For iPhone** visit the App Store.

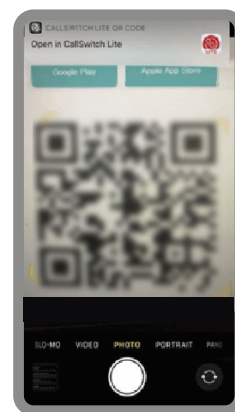

**For Android** visit Google Play Store and search for '**CallSwitch Lite**'.

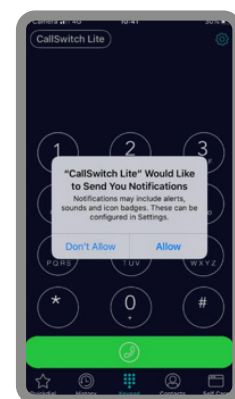

- 2 Open the app and when prompted, allow **CallSwitch Lite** to '**Take Pictures and Record Video**'.

- 3 On an alternative device, open the email we've sent you, and look for the **QR code** at the bottom.

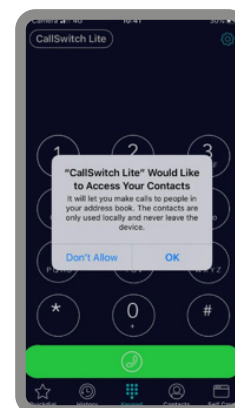

- 4 Point your phone camera at the QR code on your computer screen - this will automatically fill in your login and server details.

- 5 Once you press login, you will be asked to agree to several permissions (e.g. for all your mobile contacts to be seen on the app.)

**This will only happen the first time you login.**

- 6 And that's it! You're ready to start making calls.

**BROADWAY**  
BROADBAND

**Minimum Operations Requirements:**

You'll need at least 47MB of space to download the CallSwitch Lite app. On iOS, CallSwitch Lite is supported on mobile versions 9.0 and later. On Android, CallSwitch Lite is supported on *Android Version 5 (Lollipop)* and later."
