BROADWAY
BROADBAND

FIBRE | WIRELESS | VoIP TELEPHONY

“Honestly?
Genuine fibre
from just £19.99...
I don't just like it,
I love it”

hey there!

Technology eh... everyone's on it and high quality, reliable broadband with the x-factor is no longer a luxury, **it's expected.**

Today we have a much greater dependency on technology - whether that's for work, education, keeping the family entertained with film or music streaming services, or keeping in touch with friends and family, it's just what we all do. And, did you know, high quality broadband can also improve the value of your home.

At Broadway we're passionate about what we do. We are dedicated to ensuring that everybody gets the broadband they need. It is our ambition to provide excellent, affordable broadband to 100% of the people and businesses wherever we go – bridging the digital divide.

We're a young company using today's technology and we only focus on high speed connectivity. This means we are extremely efficient and this is reflected in our prices, which are some of the cheapest in the UK, so great value for money.

We work with individual customers, communities, local councils and national government organisations, and have a track record of delivering solutions when others may have failed. We've put together this leaflet to give you an overview of who we are and what we do, but do go online at www.broadwaybroadband.co.uk and have a look for yourself.

So if it's a yes from you, we very much hope to see you as a customer before too long.

Yours faithfully,

Michael Armitage
Chairman & CEO

BROADWAY
BROADBAND

ultrafast -

does not mean ultra-expensive

Ultrafast fibre from £19.99

Our fibre service delivers speeds of 100Mbps and beyond, and comes with unlimited data plus FREE* installation (worth up to £7,000) - all from just £19.99 a month.

We offer a range of fibre options

Our standard 100Mbps has an upload speed of 30Mbps.

We have options for 300 & 1000Mbps, and can match the upload and download speeds should you need even faster connectivity. We also offer both commercial and residential solutions should your business need an ultrafast injection!

Our telephony service

We offer state of the art telephony using your broadband connection. The technical name is Voice over Internet Protocol, (VoIP - one for a quiz night), and it offers great savings over your old landline service. The call features are fantastic and our porting service even allows you to keep your existing telephone number.

Please go online to www.broadway-broadband.co.uk/VOIP/ and have a look around. We also offer bespoke business solutions - just get in touch!

★REVIEWS

“A very reliable broadband service, a great improvement on our previous supplier.”

EDWARD

community partnership

It's about working together right?

Network building is a costly exercise, and we build the best. So our network is based on customer demand for our service - the more people who register, the quicker we will come.

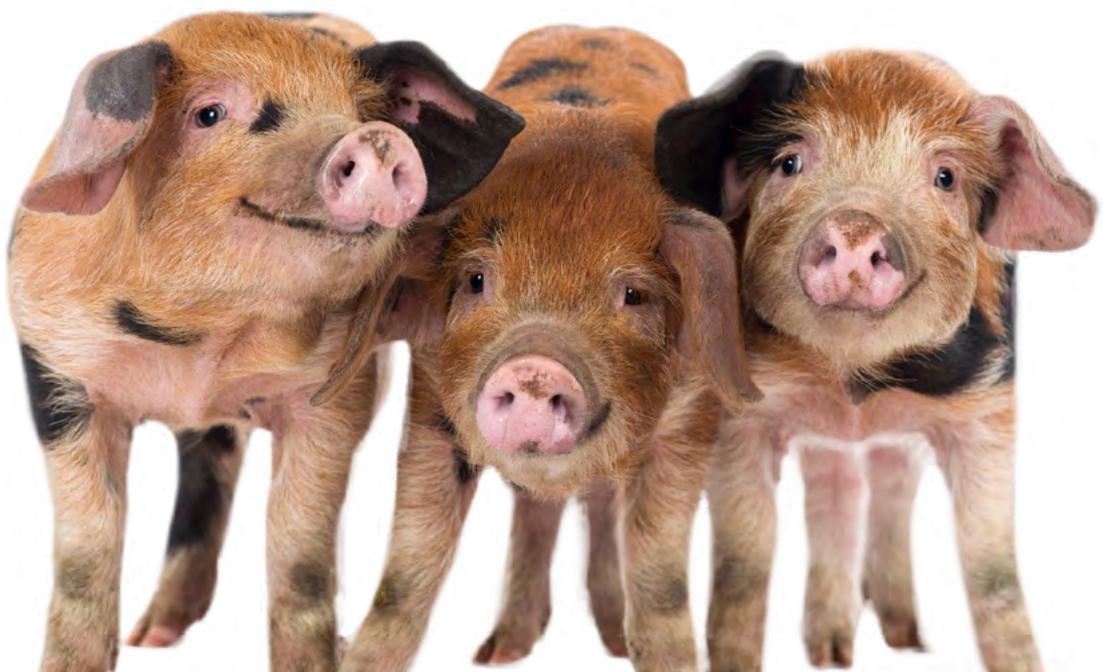

If you are interested in receiving real fibre, delivering ultrafast broadband, then please visit www.broadwaybroadband.co.uk, enter your postcode and fill in the form. If you have signed up already, a **big thank you** and there's no need to re-enter your details.

Once you've registered your interest we'll keep you updated on our progress via email - when plans are confirmed we will be in touch to talk you through what happens next, and to answer any questions you have. We always look for people to help us spread the word, so if you'd like to help then just let us know when you fill in the form.

Please remember that delivering ultrafast, golden buzzer broadband to your home cannot happen until enough people agree to sign up. So do your bit for the community by registering your interest today and sharing your ideas on how we can deliver fibre to your community quicker.

In contract with somebody else?

No huffing or puffing - registering is free and there is no obligation to place an order. It just allows us to see where the demand for fibre is. When we know the demand is there and the network has been designed, we will be back in touch to ask you to place an order. If you are still in contract, don't worry - let us know and we will do our best to find an arrangement that works for you.

funding

our networks

With the Government's pledge for gigabit capable broadband for all by 2025, we no longer have to settle for average, or sometimes downright poor, broadband.

At Broadway, not only are we proven to deliver but we also offer amazing value too. We're already working closely with both national and local government, alongside community groups across both Scotland and Wales, building lots of fibre-to-the-premise networks - where others can't or simply won't.

But it is our passion to continue to bridge the digital divide for even more rural communities, giving residents access to speeds of up to 1000Mbps – and we would love to help your community.

Building these networks can be a costly exercise, but there's government funding available through both the UK Gigabit Voucher scheme (UKGV), Superfast Cymru, and the Scottish Broadband Voucher Scheme which not only helps fund the build, but also entitles you to free installation too.

Both these schemes are supplier-led, and we will chose the scheme that best suits your project. However for us to proceed with our fibre build we need to show the Government that there is a sufficient level of interest by submitting your home or business as part of the project application.

The process

REVIEWS

The team at Broadway couldn't have been more helpful, both when discussing our service provision options and follow up communication and organisation of installation. We are very pleased to have chosen Broadway.

EWAN CAMERON

our credentials

We're a grown-up company, backed by grown-up investors, and in our modest way, and we've been making the communications world a better place since 2016.

WE DO THE TOUGH STUFF.

We approach things differently and, using the latest technologies, we can reach the places that other networks cannot.

A NEW COMPANY, WITH NEW TECHNOLOGY AND NEW THINKING.

We were the first company in Europe to deploy TV WhiteSpace commercially, when we started out in early 2016 on the Isle of Arran. We were the first to prove 60GHz Mesh technology works in a rural setting. And alongside some great technology, we use innovative business, commercial and financing models to get the problem solved.

WE'RE AN AWARD-WINNING PROVIDER.

We've won a number of awards in recent years: 'Technical Innovation for our pioneering work with TV WhiteSpace, reaching previously impossible-to-reach places. 'Most Viable 5G Use Case' for delivering Gigabit-capable service in deepest rural Wales and our Stormontfield network in Perthshire won the 'Best Community Project'.

WE WORK WITH THE BEST.

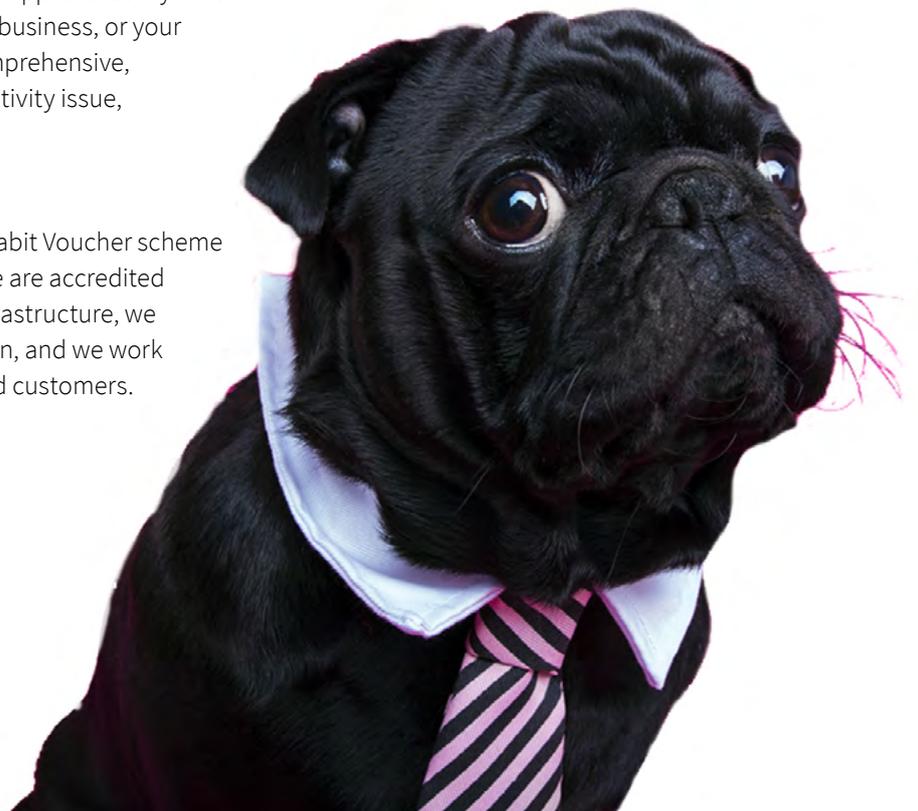

We are lucky to work with the best in the industry. And we love to partner, with customers and suppliers. So if you're looking for a solution for your rural home or business, or your community as a whole; or you long for a comprehensive, holistic approach to fixing the digital connectivity issue, then we can help.

WE'VE GOT THE CREDENTIALS.

We're a registered supplier under the UK Gigabit Voucher scheme (UKGV), we have full Ofcom Code Powers, we are accredited users of Openreach's PIA 'duct-and-pole' infrastructure, we have ISO 9001, 14001 and 45001 accreditation, and we work equally with local councils, communities and customers.

Whoever, wherever - we connect communities

what our customers think

It doesn't really matter what we think, it's what our customers think that makes us proud. We're rated 'Excellent' on Reviews.co.uk, and that puts a smile on our face each day.

We know what we're doing, and it shows. Since starting on Arran back in 2016, we've expanded to Inverness-shire, Perth & Kinross, Monmouthshire, Stirlingshire and Ayrshire – picking up hundreds of satisfied customers along the way.

Broadway Partners really care that rural isolation should not mean substandard internet service. Before switching provider, I struggled to perform even the most basic digital tasks such as opening emails, accessing links and browsing websites.

Now I have access to this wonderful technology – with its discreet installation – it's revolutionised the way I run my business. Work aside, it's removed the isolation barrier and I now stream live movies, FaceTime my son in America and keep my pets fed too. I rely on the internet for so many things and without this connection, I would be unable to exist in this rural backwater. Hoorah for Broadway.

REVIEWS

Broadway Partners are absolutely brilliant, best customer experience of any company I have dealt with. Started with Michelle arranging for an engineer to come round to the cottage which was in super fast time and Keith, the engineer, who spent considerable time finding the right location for the antenna to go. This was all done in super fast time as we were entering the COVID-19 lockdown, whilst not the most thing at the moment, it allowed us to have comfort that we can work from home. Something we'd have never have got with EE and BT. Thank you so much. Nia and Joe.
